Syntax-Unterschiede

Forall

Set db = s.currentDatabase

Call mySub(x)

Dim ht List as variant

For each

db = s.currentDatabase

mySub(x)

Dim ht as new HashTable

Use „myScriptLibrary“

Dim s as new NotesSession

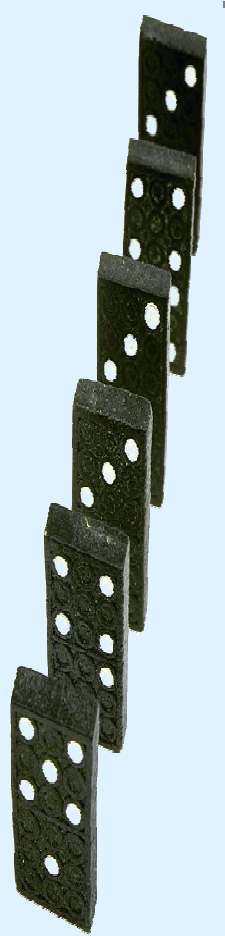

Add Reference...

Imports Domino

Dim s as new NotesSession

s.Initialize

Checklist

- 
- A vertical stack of several dominoes, showing different faces with dots, positioned on the left side of the slide.
- Add Reference... System.EnterpriseServices
 - Inherits ServicedComponent
 - Project-Properties – AssemblyInfo – COM Visible
 - Keine Shared Methods
 - Strong Name (sn.exe –k zum generieren)
 - Mit **regsvcs** aus c:\windows\microsoft.net\Framework\2.0.5555 registrieren

Ping in Lotusscript

A vertical stack of several dominoes, showing different faces with dots, positioned on the left side of the slide.

```
Sub Click(Source As Button)
  strComputer = "."
  Set objWMIService = GetObject("winmgmts:\\\" & strComputer & "\root\cimv2")
  Set colPings = objWMIService.ExecQuery ("Select * From Win32_PingStatus where Address = 'localhost'")

  Forall objStatus In colPings
    If Isnull(objStatus.StatusCode) _
      Or objStatus.StatusCode<>0 Then
      Print "Computer did not respond."
    Else
      Print "Computer responded."
    End If
  End Forall
End Sub
```
